Featherweight Decal Embroidery Designs – Using the Templates

The images on the following pages are sized to approximately the dimensions of the stitched designs: 3", 4", and 5" sizes.

To determine which size decal designs you need for your embroidery project, print out the page(s) of the designs in the size you want. Cut out the individual design images, trimming close to the edge of the image. Try these templates on your project to determine which size is most suitable.

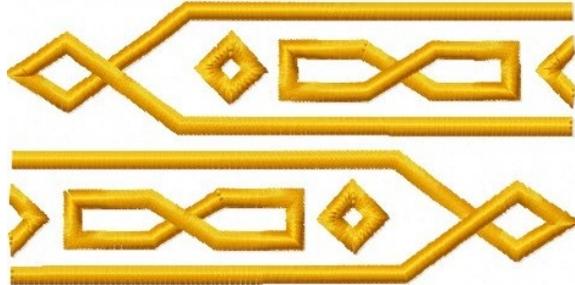

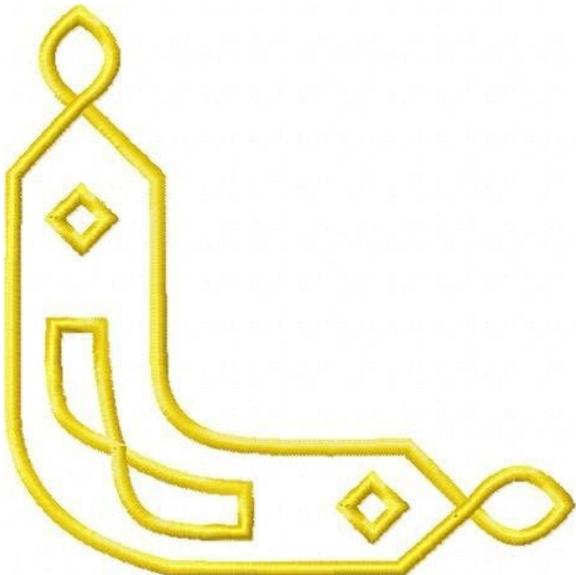

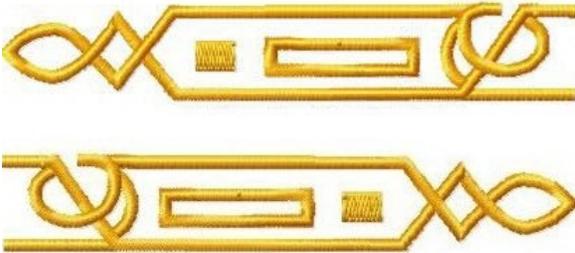

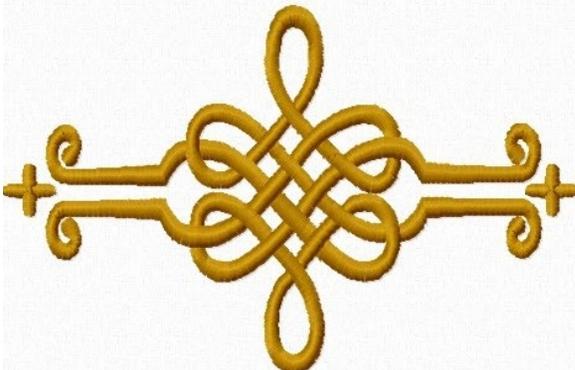

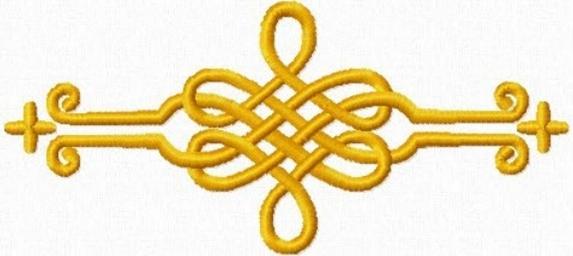

I have not made any of the Featherweight machine and case covers that are currently popular, but I believe most people have used the 4" size designs; however, please do print out the image pages and try the motifs to be sure.

If you discover that you need the design in a slightly smaller or slightly larger size than my standard sizes, please check with me. I may be able to accommodate your request.
