

Tiny Badger Toy (To Fit Mini Stocking Ornament)

<jensoriginalsembroiderydesigns.yolasite.com>

Tiny Badger stitches up in approximately 5 minutes. He sews almost entirely in the 4x4" hoop except for a line of machine stitching to close him up after stuffing. When finished, he stands approximately 1.7" x 3" and fits nicely into the Mini Stocking Tree Ornaments.

You will need

- Two 3x4.5" pieces of black felt
- A tiny amount of polyester fiber stuffing

Tiny Badger Toy Instructions

<jensoriginalsembroiderydesigns.yolasite.com>

1. Hoop a single layer of Glad Press N Seal or regular cling wrap in the 4x4" hoop. If you prefer, you can also use a lightweight water soluble stabilizer. Whichever you choose, make sure it is snug in the hoop.

Note: Plastic wrap works well for this project, but if you prefer not to use it, choose a lightweight wash-away stabilizer instead.

You really want the lightest stabilizer you can find so the toy will be pliable enough that it can be stuffed when it's finished. Don't use tear-away or cut-away stabilizers, which tend to be too heavy and stiffen the toy too much. Having recently read that sturdy plastic bags can be used as stabilizer in some cases, I decided to try it for these tiny toys, and am happy to report that it worked well, at least for my machine. Although I am using Press N Seal in the photos, I now always use plastic bags for making the toys.

2. Lay one 3x4.5" piece of black felt against the sticky Press N Seal in the centre of the hoop, pressing to hold it in place. If you are using a different stabilizer, you will need to lightly spray the felt with temporary adhesive before pressing it into position.

3. Place the hoop in the machine and stitch up to, but not including, the last color (the final black outline stitch).

4. Remove the hoop from the machine but do not unhoop the design.

5. Turn the hoop face down. Lay a second piece of felt over the back of the hoop so that it completely covers the stitching. Hold it in place with masking tape as shown.

6. Change the bobbin thread to black for the final line of stitching.

7. Once the bobbin has been changed, carefully return the hoop to the machine and stitch the final color. Remove the hoop from the machine and unhoop the design.

7. Gently remove the plastic from around the stitched toy. It should tear away easily from around the stitching.

If you have used tulle, organza, or lightweight wash-away instead of the Press N Seal, you can simply trim it along with the felt in the next step.

8. Trim around the Badger with small sharp scissors. Work carefully, making as smooth a cut as you can, since this will be the outer edge of your toy.

As you trim, leave a border of no more than 1/8" around the stitching. Leave the segment above the ears untrimmed for now, as shown at right.

9. The next step is to add a tiny bit of polyester stuffing to the toy, just enough to give it shape. I use the blunt end of a thin bamboo skewer as a stuffing tool.

10. Using tiny bits of polyester stuffing (about the size of a pea), work stuffing into the toy using the skewer. Fill each leg, then arms, then the belly, and finally the head. Use just enough stuffing to give him some shape, but don't overfill him.

11. When you have finished stuffing the body, close the top of the head with a line of stitching by hand or machine, using invisible (nylon) thread and following along the stitched guideline. A straight-sew foot is helpful so you can see what you're doing.

12. Trim the excess felt away from around the Badger's ears, leaving no more than a 1/8" border.

11. When you have closed the top of the Badger, trim the remaining waste away, leaving a border about 1/8" around the ears and top of the head. The Badger is now complete and is just the right size to tuck into one of the Mini Stocking ornaments, such as this "H" stocking in Hufflepuff colors.
